**McCreadie Group, Inc. Receives SOC 2 Type II Compliance
from CyberGuard Compliance**

Ann Arbor-based pharmacy software solutions company is fully SOC 2 Type II compliant, having completed an independent audit.

March 13, 2017 – ANN ARBOR, MI - McCreadie Group, Inc., a privately held pharmacy software solutions provider headquartered in Ann Arbor, Michigan, is pleased to announce it is fully compliant with SOC 2 Type II requirements. For the McCreadie Group, this achievement comes just six months after receiving Type I compliance.

SOC 2 compliance ensures controls are in place to safeguard client data at service organizations and is based on the Trust Service Principles and non-financial controls. The difference between Type I (test and report on design) and Type II compliance is that the latter focuses on operational effectiveness.

“Achieving the SOC 2 Type II certification demonstrates to our clients that not only is our organization designed to run with safeguards and controls in place for their data, but that McCreadie Group operationalizes the Trust Service Principles. This certification speaks to the high degree of oversight and effectiveness with which our organization is run,” said Elena Stegemann, Chief Operations Officer at McCreadie Group.

“This compliance once again shows our commitment to our clients. We put the safety and security of their data at the forefront of running the company,” said Scott McCreadie, Founder and CEO at McCreadie Group.

McCreadie Group has been transforming the way research pharmacies, residency programs, and pharmacy schools run daily operations for over a decade with web-based software solutions that automate manual processes, improve efficiency, and simplify and ensure compliance with industry standards.

About McCreadie Group

The McCreadie Group, Inc. was founded in 2004 to provide software solutions for pharmacy applications in healthcare, research, and educational settings. McCreadie Group’s goal is to drive improvements in quality, efficiency, safety, and compliance in the pharmacy profession by delivering innovative software and consultative support.
