

## PharmAcademic™ Launched for ASHP-Accredited Residency Programs

**JUNE 25, 2015 – ANN ARBOR, MICH.** – McCreadie Group announces the launch of the expanded version of PharmAcademic™, its web-based pharmacy education management software, to include the support of pharmacy resident evaluations and facilitate documentation of a systems-based approach to training, a requirement under the new ASHP (Association of Health-System Pharmacists) residency standards.

PharmAcademic and its companion product, PharmPortfolio, have been helping colleges of pharmacy manage experiential education, curricular outcomes, assessments and student portfolios since 2009.

In 2007, McCreadie Group partnered with ASHP to offer ResiTrak, McCreadie Group's residency management software, to all ASHP-accredited pharmacy residency programs. In the fall of 2014, ASHP announced its selection of PharmAcademic to replace ResiTrak in a newly expanded application.

As a result, McCreadie Group has added the functionality of ResiTrak to PharmAcademic enabling the software to support both college of pharmacy and residency-specific requirements. For residency program management, PharmAcademic is licensed solely by ASHP and is available, as a member benefit, to accredited residency programs.

In colleges of pharmacy and residencies where PharmAcademic is used, program directors and preceptors can now use one application to manage both students and residents. The combined solution enhances McCreadie Group's ability to meet the evolving needs of pharmacy educators to demonstrate student and resident learning.

"The expanded product functionality enriches our service to all pharmacy education and resident program stakeholders. This new product iteration provides intuitive, comprehensive tools to help measure student and resident competencies, improve the operations of colleges of pharmacy and residency programs, and assist these programs in meeting their accreditation standards," said Scott R. McCreadie, President of McCreadie Group. "We are very pleased to continue our great professional relationship with ASHP."

PharmAcademic, and its applicability to both colleges of pharmacy and residency program management, will be showcased at the McCreadie Group exhibit, booth 502, during the AACP 2015 Annual Conference, July 11–15, at Gaylord National Resort & Convention Center, National Harbor, MD.

**About McCreadie Group** McCreadie Group, Inc. was founded in 2004 to provide software solutions for pharmacy applications in healthcare, research and educational settings. Our goal is to drive improvements in quality, efficiency, safety and compliance in the pharmacy profession by delivering innovative software and consultative support.
