PharmAcademic™

A Comprehensive Platform Serving Pharmacists through their Entire Career.

1. **User Manager:** Manage all user information for students, preceptors, faculty and staff
   - Manage access based on user roles and security access features
   - Multiple reporting options including, but not limited to, preceptor licensing and student employment

2. **Site Management:** Manage every related detail with ease
   - Record site descriptions, rotation and preceptor information
   - Create, execute and manage affiliation agreements, requirements and site visits
   - Generate comprehensive reports to summarize site visits and current status

3. **Requirements:** Define and manage school and site requirements to ensure students are compliant and ready to start rotations
   - Manage required student training and immunizations
   - Create custom requirements to meet your needs and validate them after submission
   - Generate reports in real-time to ensure student compliance

4. **Rotation Oversight:** Extensive flexibility in the management and tracking of rotations
   - Create and assign customized rotation categories, priorities and tags for use by the match engine to meet your scheduling preferences
   - Map rotations to school's curricular outcomes to track curricular coverage as well as student progression
   - Store rotation specific documents for school and/or student viewing, i.e., required forms and readings
   - Effortlessly manage primary and secondary preceptors for each rotation
   - Generate rotation reports to easily review and manage rotation information

5. **Scheduling:** Eliminate the majority of manual scheduling and easily manage rotations
   - Supports creating the most complex of IPPE and APPE schedules
   - Manage all match details including preceptor availability, student and preceptor assessments, student assignments, and schedule change requests
   - Allow users to manage application only/hand-scheduled rotations
   - Provide site employed coordinator access to add preceptor availability and modify site descriptions and files

6. **Assignments:** Manage at a global or individual level
   - Build and manage custom experiential and co-curricular assignments
   - Custom scheduling by rotation category or student level
   - Options include co-sign and formal evaluation by student advisors, preceptors and experiential faculty and staff
   - Tailor assignments to program requirements
   - Dashboard view of assignments, i.e., submitted, scheduled, delivered, co-signature
   - Manage with advanced search and reminder capabilities to identify outstanding assignments with the click of a button
   - Map to curricular outcomes to track curricular coverage as well as assess student longitudinal performance
   - Easy to modify and reuse

7. **Learner Progression:** Define and monitor individual student outcomes
   - Map rotations as well as co-curricular and experiential assignments to program outcomes and industry standards
   - Review reports to evaluate student progression towards meeting college defined educational outcomes across the curriculum
   - Generate reports for individual students not meeting performance expectations

8. **Assessments:** Measure learner progress in support of accreditation standards
   - Build custom forms, surveys, and assessments with multiple question types to evaluate faculty, students, preceptors and courses

- Document both formative feedback and summative assessments
- Custom evaluation scales and rubrics for grade calculation
- Automated scheduling and reminders
- Dashboard view of assessments, i.e., delivered, submitted, co-signed
- Easy to modify and reuse

9. **Integrated Portfolio:** Easily manage required and optional student evidences of learning, including:
   - CV/Resume
   - Continuing Professional Development plans
   - Activity logs, Clinical Experiences, and Reflections
   - Completed course, experiential and co-curricular assessments and assignments

10. **Communication Tools:** Easily communicate with students, preceptors, faculty and staff
    - Easily import from Word to capture complex formatting
    - Send emails to specific audiences, i.e., preceptors in a specific match, students in a specific level or course

11. **Reporting:** Robust reporting module to provide insight into program quality and student practice readiness. Reporting topics include:
    - User specific information, i.e., CVs, credentials, employment
    - Experiential site and rotation information, i.e., site visit statuses, expiring affiliation agreements
    - Scheduling information, i.e., student and preceptor master schedules, preceptor availability and utilization, student to preceptor ratios
    - Faculty, course, preceptor, and student performance data
    - Course and rotation mapping information

12. **Comprehensive platform serving Pharmacists throughout their entire career with one login for students, residents, and preceptors**
    - ASHP has selected PharmAcademic as their exclusive global software provider.
    - McCreadie Group and ASHP have been partners for over a decade and are united in their commitment to simplifying the management and accreditation of Residency Programs using PharmAcademic
