

PharmAcademic™

An Integrated Software Solution  
Automating Pharmacy School and Residency  
Program Management

---

# Software Supporting the Achievement of Accreditation Standards and Requirements.

---

PharmAcademic automates and streamlines operations, keeping you focused on student learning and program needs. A solution which serves a pharmacist through school, residency and into practice. Used by ASHP as the exclusive global software for residency programs. We know, no one school is the same and PharmAcademic is built to be flexible and customizable to fit individual program needs. PharmAcademic brings together the data associated with meeting accreditation standards, managing requirements, assessments, scheduling, assignments, and much, much more.

---

---

## By Choosing PharmAcademic You Will Be Able To:

- Track learner progression against accreditation standards to ensure program oversight
- Increase student satisfaction with boundless combinations of rules to create individualized schedules based on your program's preferences. Student satisfaction has been reported to increase by 61%\*
- Automate scheduling to reduce time spent manually building schedules by 86%\*
- Standardize and simplify program operations and reallocate resources where they are needed most

*\*As reported by clients and varies by program size*

**“Purdue University College of Pharmacy began using PharmAcademic in 2009, and we have remained loyal because the McCreadie Group practices what they preach. We found them to be responsive to our enhancement requests and greatly appreciate their outstanding customer support. We could not live without PharmAcademic.”**

**Brian Shepler**

*Assistant Dean for Experiential Education, Clinical Associate Professor of Pharmacy Practice Director,  
Advanced Pharmacy Practice Experiences, Purdue University, College of Pharmacy*

## Do More with PharmAcademic.

PharmAcademic is a comprehensive platform serving pharmacists throughout their entire career with one login for students, residents, and preceptors. It's capabilities include:

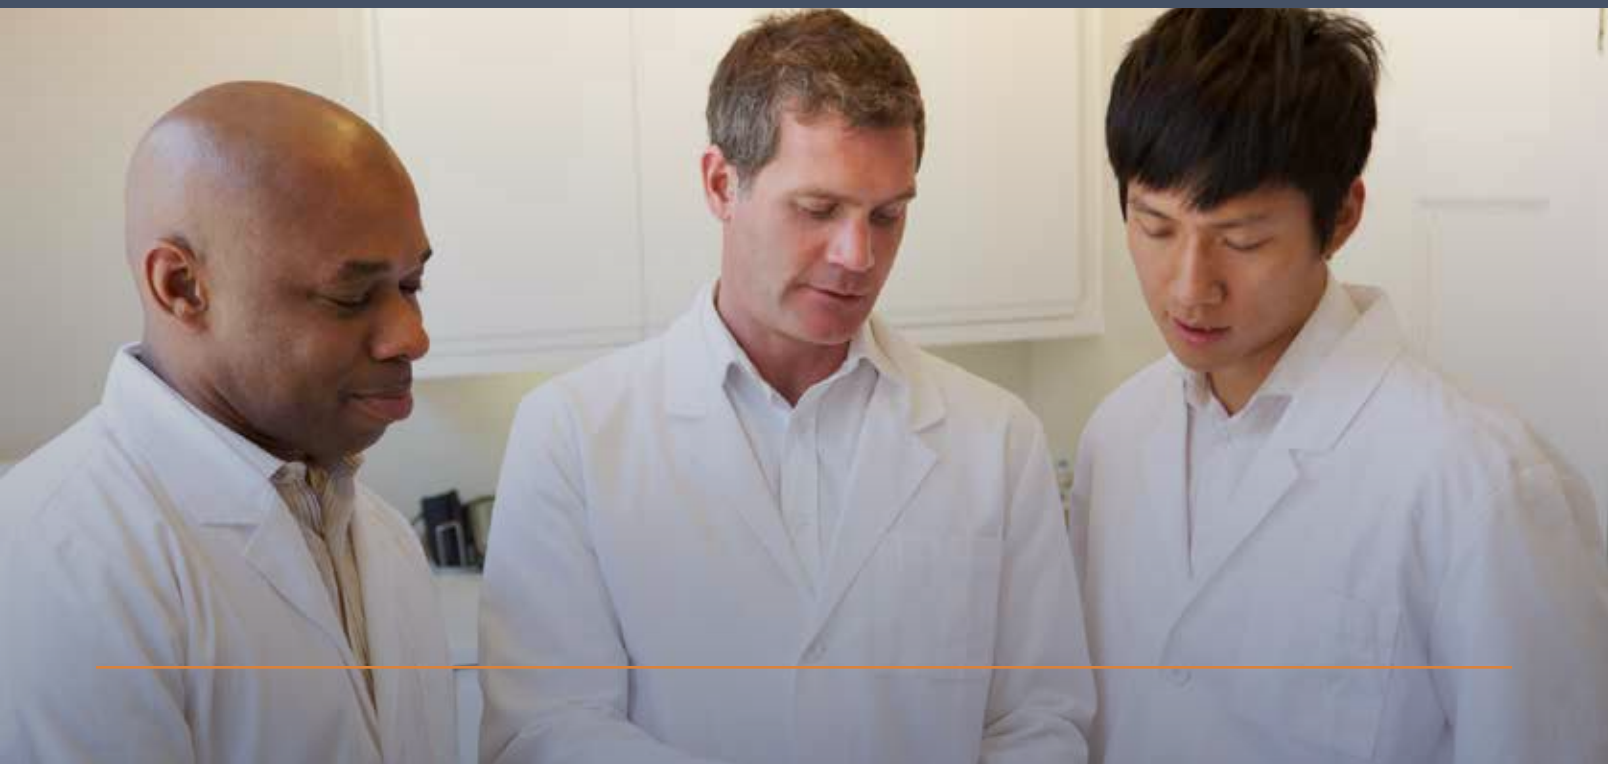

- **User Manager:** Easily manage all student, preceptor, faculty and staff information.
- **Site Management:** Record experiential site related details with ease.
- **Requirements:** Define and manage school and site requirements to ensure students are compliant and ready to start rotations.
- **Scheduling:** Use student region and rotation preference information, including blocked rotations, to build individualized schedules and meet program requirements.
- **Assignments:** Design custom assignments and select who and how they will be reviewed or assessed. Assignments automatically populate the student portfolio and are managed with the push of a button.
- **Rotation Oversight:** Extensive flexibility in the management and tracking of rotations.
- **Learner Progression:** Define and monitor individual student outcomes.
- **Assessments:** Measure learner progress in support of accreditation standards using multiple question types to meet your assessment needs.
- **Integrated Portfolio:** Easily manage required and optional student evidences of learning.
- **Automatic Reminders:** Set it and forget it to remind preceptors and students to complete assessments, assignments and requirements.
- **Reporting:** Robust reporting module to provide insight into program quality and student practice readiness.

**“PharmAcademic makes scheduling students easy. At the University of Florida, I was able to schedule 275 students with 8 APPE rotations and 550 students with 1 IPPE rotation in a matter of days versus weeks. The program walks you through the process one step at a time, listing all the steps in one column and your reports in a separate column. The reports are easy to read and cover everything from student rankings to preceptor availability. The match feature also allows you to add requirements for all students in one place and the option to adjust individual student requirements.”**

Heather Hardin

*PharmD, BCACP, Clinical Assistant Professor and Director of the Office of Experiential Programs,  
University of Florida, College of Pharmacy*
