

Vestigo®

A Feature-Rich Solution Increasing Safety, Compliance & Efficiency.

- 1. Increase accuracy and safety** with a series of checks and balances to ensure the correct investigational drug reaches the right patient and greatly reduces the likelihood of errors
 - Built-in workflows to ensure safe practices
 - Extensive reporting to track operations, processes and financials
- 2. Create electronic Drug Accountability Records** that are complete, accurate and legible facilitating compliance with study regulations
 - HIPAA and 21 CFR Part-11 compliant
- 3. Generate efficiency and standardization** while enhancing staff satisfaction
 - Dramatically reduced manual processes typically experienced in IDS
 - Significantly decreased time spent on paperwork and handwriting
- 4. Allow research pharmacies to grant temporary and read-only access** to monitors for the purpose of reviewing and authorizing information using Vestigo Verify™
 - Monitors have restricted access to the system to view authorized protocols in one place
 - Study Coordinators can have read-only access for select protocols
- 5. Secure web-based application**
 - Access from any device with a secure browser
 - Standardize data collection and dispensing process
 - Minimal IT resource support
 - Use your network login with A.D. authentication using SAML
 - Roles based security

Features & Capabilities:

1. Automated Protocol Management

- Ability to structure the most complex of protocols in a logical and safe manner including arms, drugs and orders
- Automatically limits drugs to those used in selected protocol

2. Automated Inventory Management

- Robust tracking features by lot number/item number, patient-specific inventory, document returns and destructions
- Automatically ties inventory to dispenses, updating the system in real-time
- Real-time checks for drug expiration dates

3. Integrated Dispensing & Labeling

- Generate high quality, accurate labels with barcodes
- Automatic label generation and inventory updates upon dispensation
- Patients only enrolled in the study are eligible for dispensing

4. Billing Management

- Fully automated protocol dispensing fees, invoicing, payments and accounts receivable

5. Electronic Drug Accountability Reporting

- Standardized drug accountability reports are available including: NCI, NCI Oral, ACTG, Summaries, Single Subject, etc.

6. Competency Management

- Document in-services and competencies completed
- Restrict access to protocols based on competency level

7. Scheduling

- Track appointments or events and monitor visits with a calendar feature

8. Chain of Custody

- Document the movement of a dispense as it moves through the various stages in the pharmacy
- Track its movement to the clinic, patient, or affiliated site with a scan-able barcode
- Inventory Transactions - Coming soon!

9. Access Code Repository

- Store and retrieve sponsor access codes

10. Temperature Excursion Documentation and Tracking

- Capture and record all actions associated with temperature excursions

11. Monitor Management

- Grant temporary and restricted access to monitors for the purpose of reviewing and authorizing information using Vestigo Verify™

12. Reporting

- Extensive reporting which allows for accurate tracking of operations, workflows, and financials

Vestigo Interfaces with Common CTMS and EMR Systems, and Integrates with Carousels in Real-Time for Seamless Communication Transfer.

- Real-time building and updating of protocols with the Vestigo-OnCore interface.
- Transmit prescription information in real-time with the Vestigo-EMR interface.
- Cerner – Coming soon!
