

TRANSMIT ORDER DETAILS IN REAL-TIME

Receive Orders Quickly and Automatically in Vestigo

- The interface sends verified orders to Vestigo in real-time.
- The EMR order is linked to the drugs on the Vestigo order through a unique identification code.
- Orders enter a queue for processing by the designated pharmacy team member.
- Checks and balances within the interface ensure Vestigo captures accurate information from the EMR order details.
- A queue for mismatched or unmatched orders ensures no orders are missed.

Increase Efficiency and Safety

- **Increase efficiency** by eliminating the manual transcription process to perform accountability and dispensing in Vestigo.
- **Improve safety and dispensing time** by matching the order to the protocol, patient, and drug.
- **Facilitate compliance** by ensuring Vestigo dispenses match EMR dispenses.
- **Improve documentation** with more complete and accurate Drug Accountability Records.
